DIGITAL ASSET SCHEDULE & DATE-OF-DEATH VALUATION

# Estate of Sample Estate

Inventory of on-chain crypto-assets held at the identified addresses, valued in USD and GBP at the date of death from sourced historical market data.

| | |
|---|---|
| Date of death | 01 June 2025 |
| Valuation point | 01 June 2025, 12:00 UTC |
| Addresses reviewed | 1 |
| Total value (priced items) | **$0.00 · £0.00** |
| Report generated | 31 October 2026, 16:58 UTC |

Read-only analysis. No private keys, seed phrases or wallet access were requested or used. Not legal or tax advice.

SAMPLE REPORT · REAL PUBLIC ADDRESS · FICTITIOUS DECEASED · FOR DEMONSTRATION ONLY

## 1 Summary

| TOTAL AT DATE OF DEATH | PRICED HOLDINGS | ITEMS NEEDING ACTION |
|---|---|---|
| $0.00 | 0 | 1 |
| £0.00 at USD/GBP 0.74186 (2025-05-30) | 0 unpriced (excluded) | unclaimed / stuck / forgotten |

### Addresses

`0x50430776abb10873e5c78274b630c73e152a92b7`

## 2 Holdings at date of death

| CHAIN | ASSET | AMOUNT (EXACT) | UNIT PRICE | USD | GBP | PRICE SOURCE & BALANCE BASIS |
|---|---|---|---|---|---|---|
| **No holdings with a non-zero balance were found at the date of death by the sources that ran.** This is not proof that the deceased held no crypto-assets (see Limitations). | | | | | | |
| **Total (priced items only)** | | | | **$0.00** | **£0.00** | |

## 3 Unclaimed, stuck or forgotten items (current scan)

> These come from the GhostYield read-only scanner run on 31 October 2026, 16:58 UTC. Items created after the date of death are shown for completeness: they indicate post-death wallet activity, which the personal representatives should investigate. They are not added to the DoD total.

| CHAIN | SOURCE / STATE | AMOUNT | RELATION TO DOD | HOW IT IS CLAIMED |
|---|---|---|---|---|
| Ethereum | Lido withdrawal (unstETH NFT)<br>FINALIZED_UNCLAIMED | `0.976394623146598186 ETH` | Did not exist at DoD: request created after the date of death. Not in DoD total. | Open https://stake.lido.fi/withdrawals/claim, connect the wallet, and click Claim (or call claimWithdrawals([138849],[1251]) on 0x889edc2edab5f40e902b864ad4d7ade8e412f9b1 from the owner). |

## 3b Current position (for information, not a DoD value)

> All items the read-only scan found today, valued at today's DefiLlama price. Differences from the DoD schedule indicate activity after the date of death.

| CHAIN | ITEM | AMOUNT | CURRENT USD | PRICE SOURCE |
|---|---|---|---|---|
| Ethereum | Lido withdrawal (unstETH NFT) ETH `0x50430776abb10873e5c78274b630c73e152a92b7` | `0.976394623146598186` | $2,197.48 | DefiLlama coins.llama.fi/prices/current · ts 2026-10-31 16:57 UTC |
| Ethereum | native balance ETH `0x50430776abb10873e5c78274b630c73e152a92b7` | `0.009979881495262702` | $22.46 | DefiLlama coins.llama.fi/prices/current · ts 2026-10-31 16:57 UTC |
| Ethereum | ERC-20 balance STETH `0x50430776abb10873e5c78274b630c73e152a92b7` | `0.000000000000000001` | $0.00 | DefiLlama coins.llama.fi/prices/current · ts 2026-10-31 16:57 UTC |
| Ethereum | ERC-20 balance DIXT `0x50430776abb10873e5c78274b630c73e152a92b7` | `0.000000000005000000` | — | No price found (UNKNOWN) |

## 4 Executor action checklist

- ☐ **Secure, do not move**
  Do not transfer, sell or 'test' any asset until the grant of representation and your instructions permit it. Never type a seed phrase into any website. GhostYield never asks for one.
- ☐ **Locate access**
  Look for hardware wallets, recovery-phrase backups, password managers and exchange account emails among the deceased's papers and devices. Keep originals sealed and note chain of custody.
- ☐ **Exchanges**
  For assets held on exchanges (not visible on-chain under these addresses), write to each exchange's bereavement team with the death certificate and grant. Request a DoD statement.
- ☐ **Claim a Lido withdrawal**
  A finalized Lido withdrawal is held by the Lido WithdrawalQueue contract until the owner of the unstETH NFT claims it. Once lawfully in control of the wallet: open stake.lido.fi/withdrawals/claim, connect the wallet, select the request and click Claim (or call claimWithdrawals(requestIds, hints) on 0x889edc2e...f9b1). ETH is paid to the claiming wallet. Gas is paid in ETH.
- ☐ **L2 bridge withdrawals**
  Unfinalized Optimism/Base/Arbitrum withdrawals listed below must be proven/finalized on Ethereum from the owner's wallet via the official bridge UI. Funds are not lost but will not arrive until this is done.
- ☐ **Spam tokens**
  Tokens with no market price are commonly unsolicited 'airdrop' scams. Do not visit websites named in them or approve anything. They are listed but valued at nil/unknown.

☐ **HMRC / IRS**
UK: include the DoD values in the IHT400 (or excepted-estate return) and keep this report with the working papers; HMRC's Cryptoassets Manual (CRYPTO22000+) treats exchange tokens as property of the estate. US: use DoD fair market value for Form 706 where required and for the step-up in basis. Confirm with the estate's tax adviser.

☐ **Re-check before distribution**
Values and on-chain state change. Re-run the scan immediately before any claim, sale or transfer to beneficiaries.

## 5 Methodology

1. **Valuation point.** 12:00 UTC on the date of death. For each EVM chain the block nearest that time was taken from DefiLlama's block API (coins.llama.fi/block).
2. **Balances.** Native coin and ERC-20 balances read with eth_getBalance / balanceOf at that block via archive JSON-RPC (Alchemy where configured, public RPCs otherwise). Tokens checked: every token the current scan found plus a list of canonical tokens (stETH, wstETH, WETH, USDC, USDT, DAI, WBTC and per-chain stables). Lido withdrawal requests were read from the WithdrawalQueue at the DoD block. Where historical state was not available the current balance is used and labelled CURRENT.
3. **Bitcoin.** Confirmed transactions from mempool.space replayed up to the valuation time.
4. **Prices.** USD prices from DefiLlama historical prices (coins.llama.fi/prices/historical/<timestamp>), the nearest observation to the valuation point, with its timestamp and confidence shown per row. CoinGecko's /coins/{id}/history was also queried as a cross-check:
    - no assets requiring a cross-check

    No price is estimated, interpolated or assumed. An asset without a sourced price is shown as UNKNOWN and excluded from totals.
5. **GBP.** USD values converted at the ECB USD/GBP reference rate for the date of death or the latest prior business day (2025-05-30: 0.74186), via Frankfurter API (European Central Bank reference rate).
6. **Unclaimed items.** GhostYield scanner adapters: Lido withdrawals, Optimism/Base and Arbitrum bridge withdrawals, Uniswap v3 uncollected fees, legacy DEX balances, multi-chain balances.

Source status:

- **scanner lido_withdrawals (0x504307...)**: ok, 1 finding(s), 5.7s
- **scanner op_stack_withdrawals (0x504307...)**: ok, 0 finding(s), 23.2s
- **scanner arbitrum_outbox (0x504307...)**: ok, 0 finding(s), 91.6s
- **scanner balances (0x504307...)**: ok, 3 finding(s), 70.6s
- **scanner uniswap_v3_fees (0x504307...)**: ok, 0 finding(s), 5.6s
- **scanner legacy_dex (0x504307...)**: ok, 0 finding(s), 2.0s
- **scanner source_note (0x504307...)**: Base withdrawals: explorer unavailable (Base event history unavailable (base.blockscout.co); used Alchemy transfers | Arbitrum One: Blockscout unavailable (arbitrum.blockscout.com: HTTPError HTTP Error 403: Forbidden); used https://arb1.arbitrum.io/rpc eth_getLogs in 10,000,000-block windows

Run notes:

- reused scanner output report_0x50430776abb10873e5c78274b630c73e152a92b7_26313974.json
- BNB Chain: archive balance at block unavailable (all providers failed: RuntimeError); CURRENT balance used

## 6 Limitations & disclaimer

This schedule covers only the addresses supplied and the chains and protocols listed above. It does not cover centralised-exchange accounts, NFTs, most DeFi positions (lending, LP tokens other than Uniswap v3 fees), other chains, or assets held at addresses not identified. Controlling a key is not proof of legal title, and an address being supplied is not proof that it belonged to the deceased. Market prices for thinly traded tokens may not reflect a realisable value; HMRC or the IRS may take a different view of value (for example, a blockage discount or a different exchange price). Historical prices are third-party data and may be revised.

**Not legal, tax or financial advice.** GhostYield Estate provides a factual, read-only data report to assist the personal representatives and their professional advisers. It is not a formal valuation by a regulated valuer. Personal representatives remain responsible for the values they submit to HMRC (IHT400) or the IRS. Consult a qualified solicitor or tax adviser.
